Difonia is the new funk-rock album by Piedmontese guitarist Denny Bertone, available from April 1, 2022 on the main streaming platforms and on YouTube with live set videos for the official launch.

The album marks a fundamental point in the artist's compositional path, already begun many years ago with original productions for advertising videos in the musical field. This work was completely self-produced and recorded "live" that is, live in the studio to consolidate the groove and the interaction between all the members of the band.

"Difonia is the emission of two contemporary sounds due to an injury to the vocal cords. The groove of funk and the energy of rock within these songs are, in my opinion, the best representation of this concept. Dreaming of going back on stage, closed in my studio because of the pandemic, I composed ten energetic, fun and engaging songs to be a spokesman for my need, Not only that, positive and proactive restart after 2 years of restrictions and closures" says Denny about the project.

Denny's album cover is masterfully done by Dave Smith, a London illustrator better known as Hatch\_art. A real work of art that wants to reiterate this sound dichotomy in an explosion of colors and images, so much so that to enhance it were not superimposed writings or headings, leaving list the tracklist directly from the objects and characters of the back cover, designed specifically to recall the various titles of the songs..

Entirely written by Denny Bertone, Difonia, it has been arranged almost completely at a distance with all the members of the super band composed by: Marco Bellone keyboard, Roberto giordanengo bass, Alessandro Prato drums, Michele Chiaravalloti sax, Corrado Vergano percussion, Stefano Cocon trumpet, Enrico Allavena trombone. A rich and unusual ensemble for a

"guitar oriented" project, which allowed to take advantage of sounds and arrangements typical of the great funk-fusion bands overseas, creating an innovative sound, never taken for granted, but easy to listen to and enjoy.

The album was recorded, mixed and mastered by Carlo Miori at Only Music Studio by Bruino Denny Bertone..

## **Biography – Denny Bertone**

Denny Bertone, guitarist, teacher, arranger and composer, has played for many artists and collaborated with excellent Italian and international brands such as: Xotic effects USA, Cicognani engineering, Dogal strings, Essetipicks and Tucci Instruments with whom he participated at NAMM 2020 as project consultant for their new line of guitars.

He graduated in 2009 at the Lizard Academy in Turin in rock-fusion guitar with the highest marks and special mention, under the guidance of Miky Bianco. He holds courses and workshops in many Piedmontese schools of modern guitar, effects, improvisation and ensemble music.

Born in Marene, in 1985, Denny discovers at the age of 9 his passion for music, for about 25 years playing the electric and acoustic guitar, preferring rock certainly, but very sensitive to the concept of "fusion" music, that is, everything you can use, mix and contaminate to create new ideas and sounds.

His guitar line-up has always been inspired by great guitar myths such as Jimi Hendrix, Jeff Beck , David Gilmour later approached rock-fusion and funk guitarists, referring to understands like Brett Garsed, Nile Rodgers, Steve Cropper, Greg Howe and Gouthrie Govan.

In addition to the intense teaching activity, he works as session man and the current projects in which you can see him engaged are the "Magasin du café" World-Prog Rock, and his solo project from which was born the first instrumental album "Difonia".
